

## ABOUT US

**mfc-michèle didier** is born in 1987 and focuses since then on the production and on the publication of original works, although "multiples", by contemporary artists. Playing the part of an intermediary between the artist and production's professionals (printing, film industry, etc.), **mfc-michèle didier** gives the artist a complete freedom to develop his project.

In that way, **mfc-michèle didier** produces books, installations, films, videos. A collection of artist videos called Import is created in 2003 by **mfc-michèle didier** in association with Les Presses du Réel.
